

PD101 Health, Safety, Environment & Quality Policy

ERG Group Health, Safety, Environment & Quality Policy

The ERG Group, consisting of ERG (Air Pollution Control) Ltd, ERG APC Maintenance Ltd and ERG (Plastic Fabrication) Ltd, has the motto of “**Technology for a Sustainable Future**”. The ERG parent company together with its subsidiaries strive to achieve this aspiration in the fields of gas cleaning, air pollution control and odour control for its industrial and municipal clients.

We also provide associated equipment which can be applied to the destruction of liquid and solid wastes.

ERG Group is committed to supplying integrated systems and services to its process industry customers using the best available techniques (BAT) and where ever possible using ERG’s in house technology and expertise.

ERG Group is dedicated to supplying innovative and best available technologies (BAT) which assists its clients to build and operate systems which comply with the relevant regulations and codes of conduct with regard to the environment.

Our policy is to professionally execute financially viable, commercially sound contracts for the complete delivery of cost-engineered products, systems and services.

We manage this by following our Group and subsidiary business plans, our business management system (BMS) and by complying with the following internationally recognised standards:

- Quality Management System to ISO 9001 standard since 2002;
- Environmental Management System to ISO 14001 standard since 2011;
- Health & Safety Management System to ISO 45001 standard from 2017.

This ERG Group HSEQ policy is reviewed annually, amended where necessary and circulated to all involved. It should be read in conjunction with the associated ERG Group Quality, Environment and Health and Safety policies (PD102, PD103 and PD104).

Signed:

Date: 04 / 01 / 2017

James Scott-Bowden
ERG Group Managing Director
